V6 · STEP 6 · JULY 2026 **V6 09 MEMBERS HUB MAIN HOME** **AUTHORITATIVE WIREFRAME** INHERITS V6 00 · V6 91 · V6 92

Members Hub Main Home

Authoritative Hub dashboard wireframe. Three-column shell: 240px left rail, flexible main content, 280px personal rail. Five content sections per the approved specification. Two states — populated and new-member day one. Desktop 1440, Tablet 768, Mobile 390.

Productivity application built on the Refined Editorial Luxury language. Photography dominant at ~55% visible area. One gold CTA per view. Statistics visually quiet. Design reference only — no implementation, no tokens, no CSS.

SHELL
240px Left Rail · Fluid Main · 280px Personal Rail

SECTIONS
Welcome · Attention · Work · Club · Journey

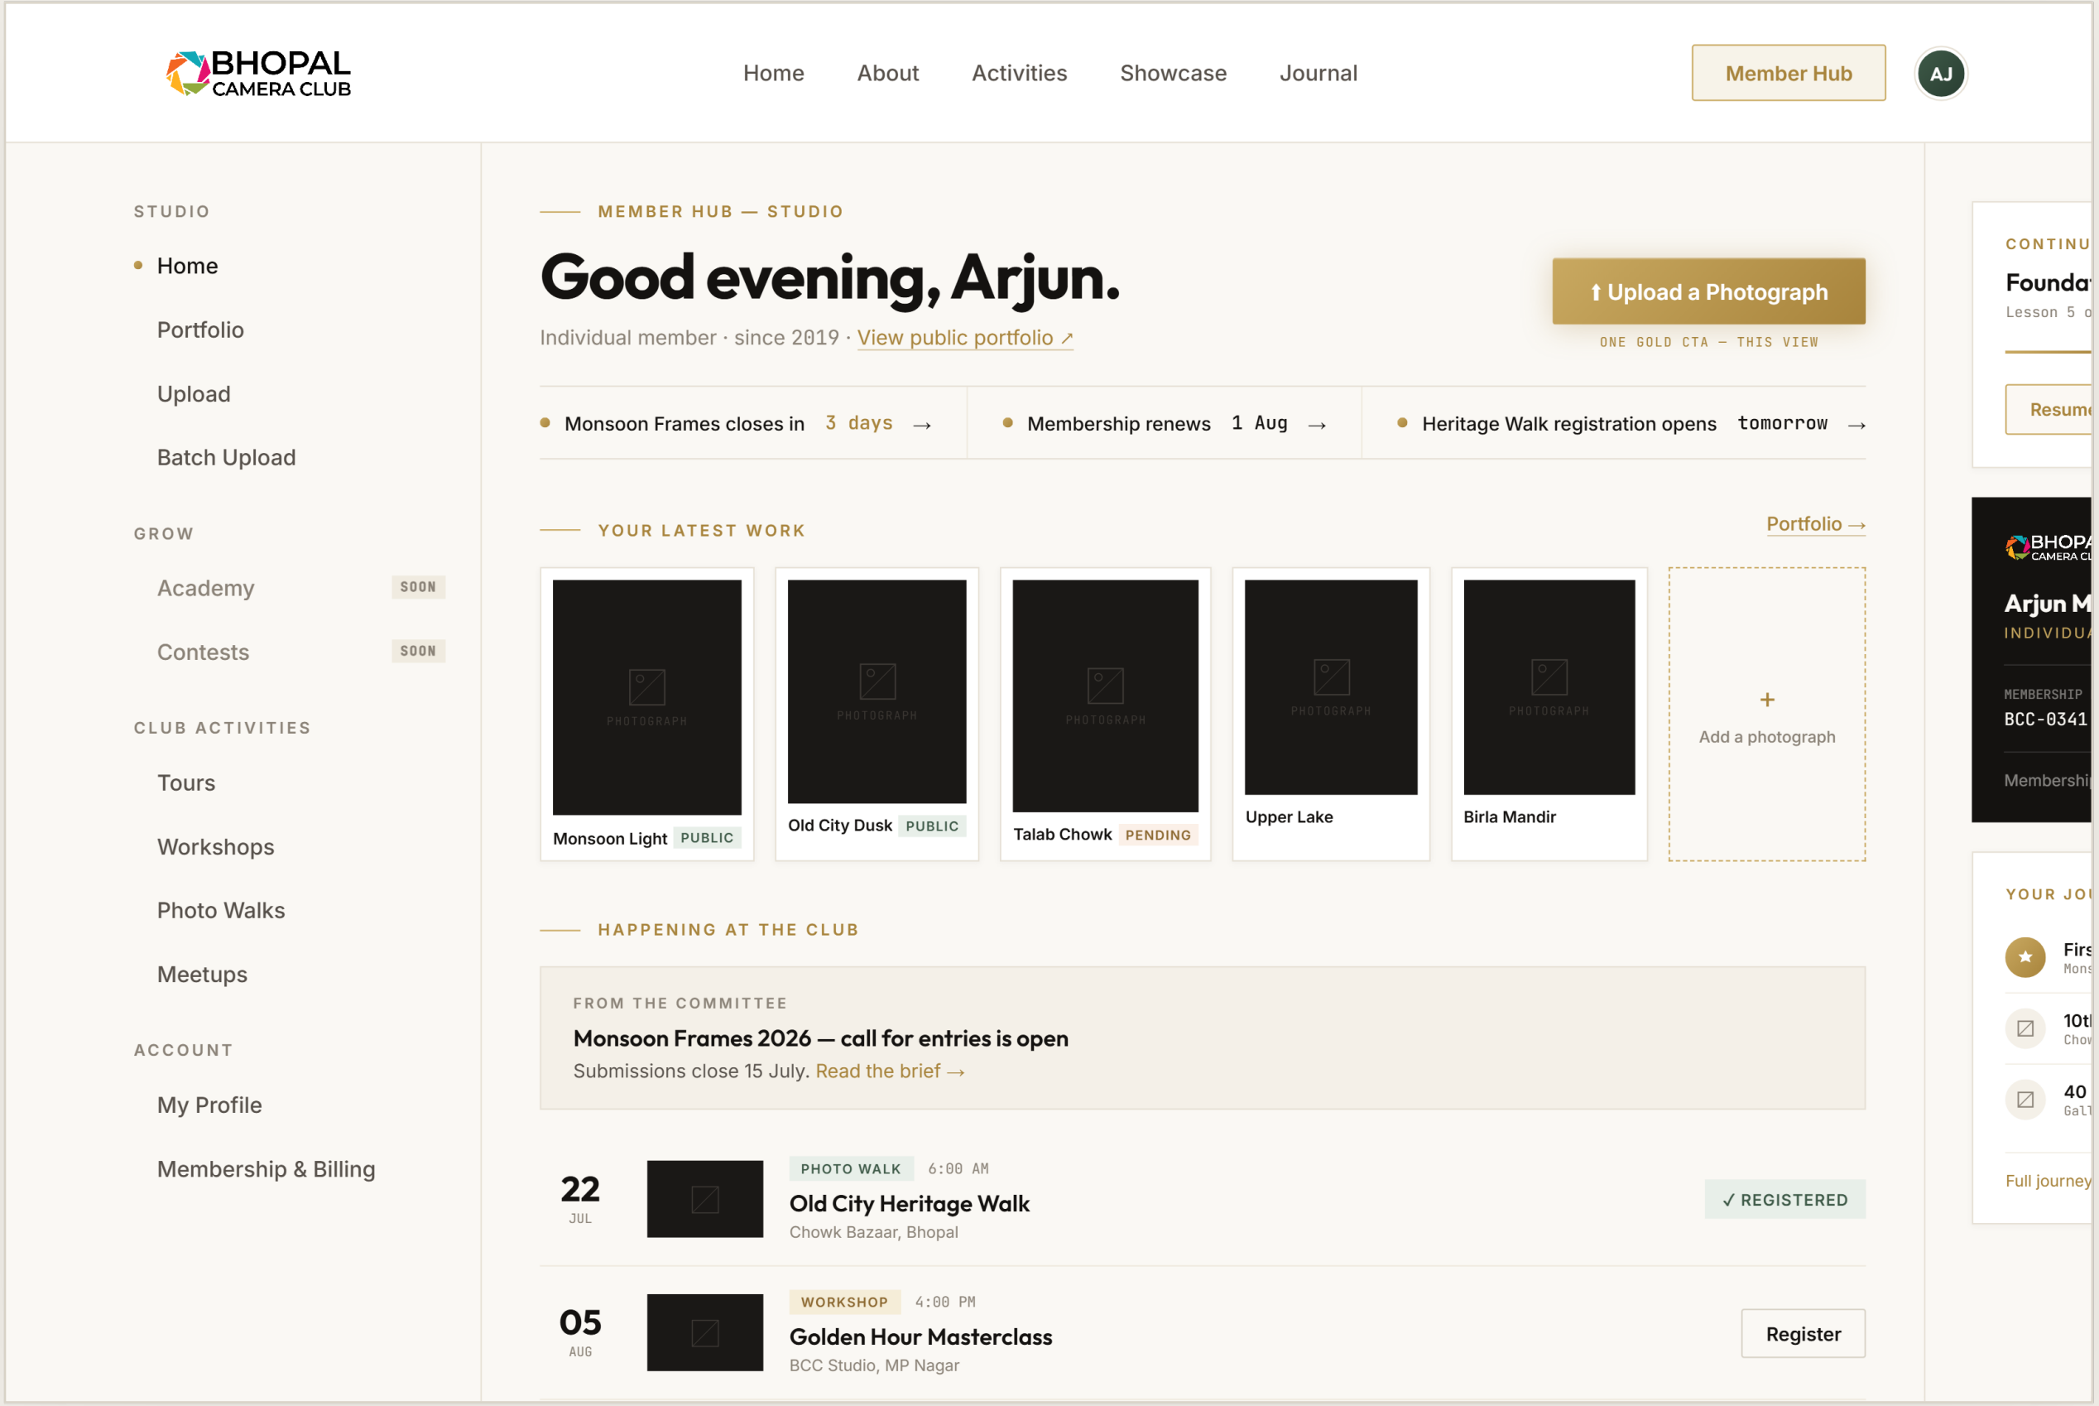
GOLD CTA
One only — Upload a Photograph

BREAKPOINTS
≥1200 Rail · 641–1199 HubTabs · ≤640 HubMobileBar

01 Desktop — populated member

Established member, evening session. All five content sections active. AttentionRow renders two items. Personal Rail shows Academy progress and compact Membership Card. One gold CTA visible across the entire view.

Hub Home — established member POPULATED `1440 · shown at 50%`

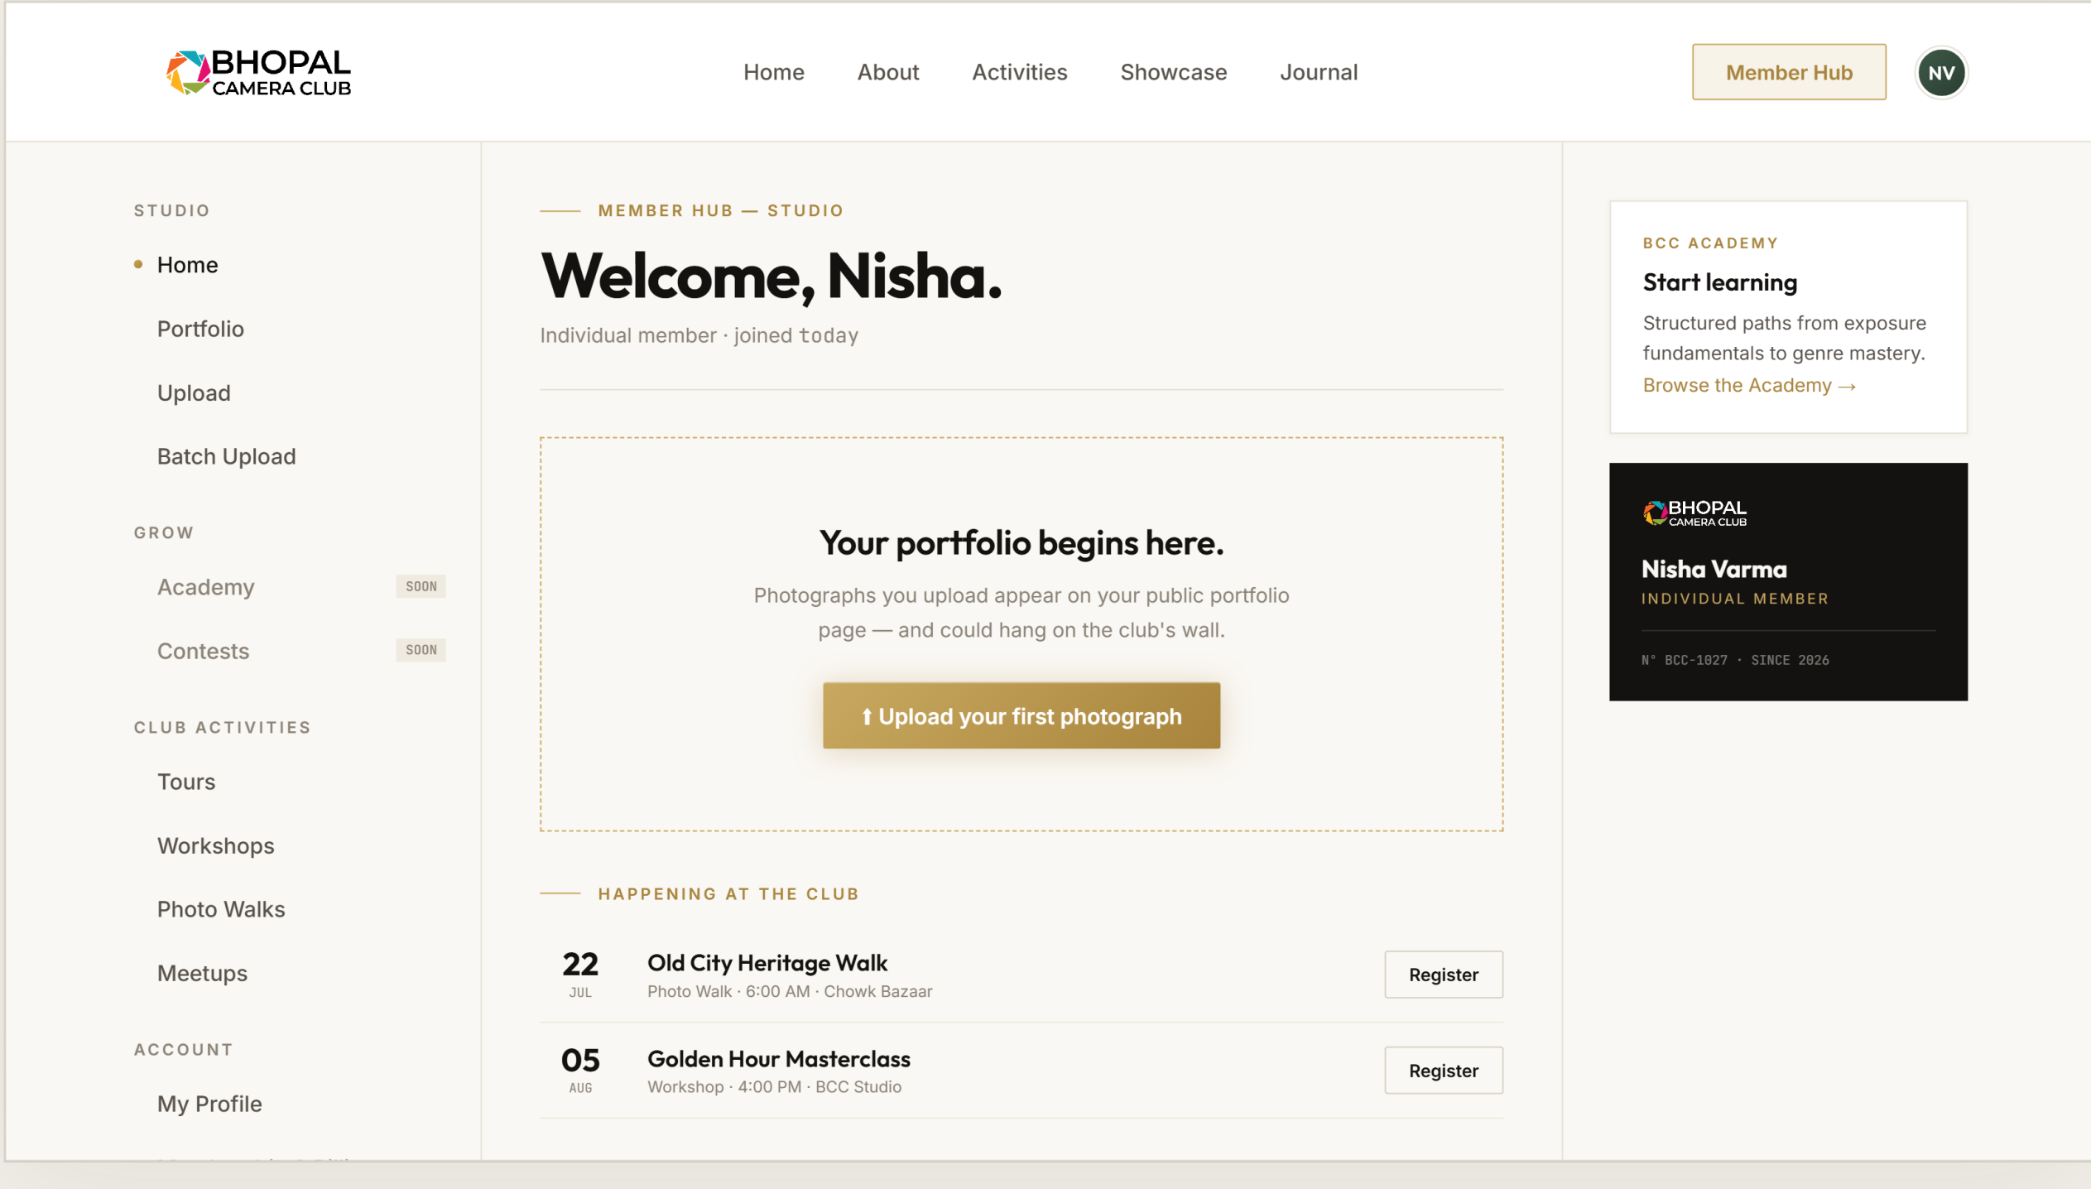


Three-column shell: 240px left rail · flexible main (≈640px) · 280px personal rail, 40px gaps, 48px outer padding. One gold CTA (Upload) pinned to WelcomeBand. AttentionRow renders ≤ 3 computed items; disappears entirely when empty. RecentWork grid: 5 mats at 4:5 + dashed upload tile. Journey Numbers strip is the lowest-priority section — ink-400 figures, no colour.

02 Desktop — new member, day one

No photographs yet. AttentionRow hidden. Journey Numbers hidden. RecentWork replaced by the warm empty-state frame — the single gold CTA moves here. Personal rail shows Academy browse prompt and card. No hollow widgets, no zero-counts.

Hub Home — new member EMPTY `1440 · shown at 50%`



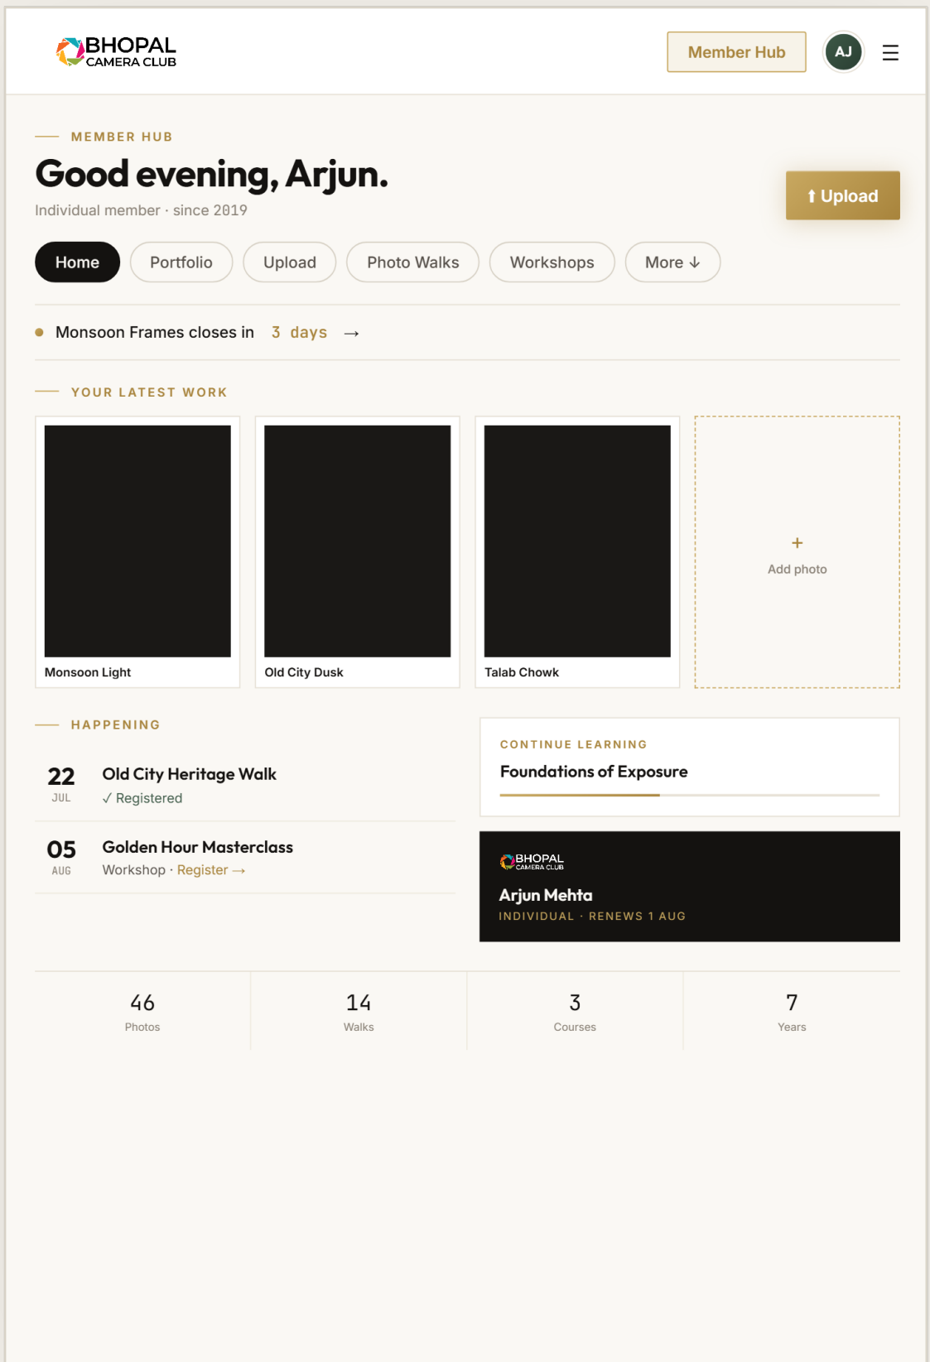
Photographs you upload appear on your public portfolio page — and could hang on the club's wall.

Day one: AttentionRow absent (nothing to flag). Journey Numbers absent (all zero). RecentWork absent; replaced by warm empty-state frame carrying the page's single gold CTA. Personal rail shows Academy browse prompt — no progress bar, no journey milestones. The view is short, warm, and complete.

03 Tablet — 641–1199px

Left rail folds into horizontal-scroll HubTabs chips. Personal Rail drops below main content feed. Three-col shell collapses to single-column. Content order preserved from desktop.

Hub Home — tablet POPULATED `768 · shown at 60%`

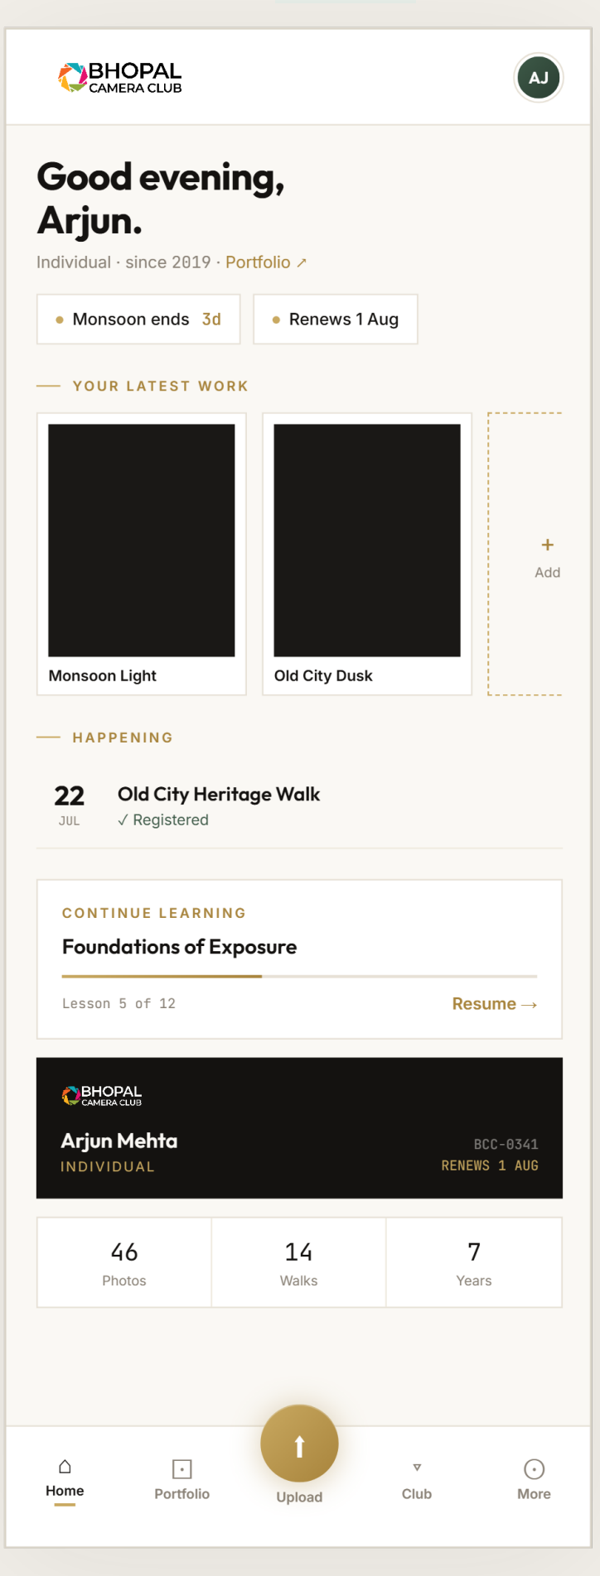


641–1199px: rail folds into horizontal-scroll HubTabs (ink-fill active = Home). Personal rail drops into a 2-col band alongside events. Photo grid runs 4-up. Gold Upload stays in WelcomeBand.

04 Mobile — ≤640px

HubMobileBar replaces rail entirely. Gold Upload is the raised centre action. Attention items compact to scroll chips. Work grid horizontal-scrolls. Personal rail stacks below events.

Mobile — full scroll POPULATED `390 · 75%`



HubMobileBar: 84px + safe area, ivory blur, raised gold Upload circle (52px) as page's one gold. "More" opens full nav as bottom sheet. Home underline-dot active.

05 Specification

SECTION ANNOTATIONS

① **WelcomeBand** — time-aware greeting. Member tier + profile link. Sole gold CTA for the view. Hairline base rule. On day one the band carries no CTA (moved to empty-state frame).

② **AttentionRow** — max 3 computed items. Deadlines, renewals, upcoming registrations. Hairline top + bottom. Disappears completely when no items — no empty state placeholder.

③ **RecentWork** — 5 newest photographs at 4:5. Public/Pending badge. Dashed upload tile at end. "YOUR LATEST WORK" kicker with Portfolio link.

④ **Happening At The Club** — announcement card from committee. Event rows: date pillar · 3:2 image · badge + title + venue · registration state.

⑤ **Journey Numbers** — lowest visual priority. Mono figures on hairline grid. Hidden if all zero (new member). No animation hook required at MVP.

VISUAL HIERARCHY

1. Photography (55% visual area)
2. Time-aware greeting
3. Gold Upload CTA
4. Attention items (if present)
5. Happening At The Club
6. Academy progress
7. Membership Card
8. Journey Numbers
9. Left rail (wayfinding)
10. Site header (public exit)

Gold appears twice per view: active dot in rail + page CTA. Never a third instance. Shell (rail, header) stays ink-600/400 on ivory — never competes with content.

SPACING SPEC

```
container max 1360 · pad 48
shell grid 240 · 1fr · 280
shell gap 40px
rail row 44px h · dot 60
rail group label 24 above · 8 below
personal rail border-left + 32 pad
welcome band 44px h1 · 28 below
attention row hairline top+bottom
work grid 6-col · 14px gap
event row 56px date · 80px img
journey strip 18px padding · 5-col
mat aspect 4:5 · square corners
event img 3:2 · square corners
```

RESPONSIVE + CONDITIONAL

```
≥1200 3-col shell + rail
641–1199 HubTabs chips
≤640 HubMobileBar
```

Conditional rendering
AttentionRow: hidden when zero items
Journey Numbers: hidden on day one
Journey Strip: milestones with zero value hidden

Loading states
Photo mats: satin shimmer on --surface-2
Personal rail: shimmer on card surfaces

Admin-controlled
Announcement card content (CMS)
Coming Soon labels on Academy + Contests

COMPONENT TREE

```
AuthLayout (role ≥ member)
├ SiteHeader {session, member}
└ HubShell
  ├ HubRail {hubNav[], activeRoute}
  │  └ [≥1200px only]
  ├ HubMain
  │  ├ HubTabs [641–1199px]
  │  ├ WelcomeBand {member, timeOfDay}
  │  ├ AttentionRow? {items[]}
  │  ├ RecentWork {photos[], uploadLink}
  │  ├ HappeningAtTheClub {events[], notices[]}
  │  └ JourneyNumbers? {stats}
  ├ PersonalRail
  │  ├ AcademyContinue? {progress}
  │  ├ MembershipCard {member, tier}
  │  └ JourneyStrip? {milestones[]}
  └ HubMobileBar [≤640px]
SiteFooter
```

? = conditional
AttentionRow renders only when {items.length > 0}. JourneyNumbers renders only when member has activity. AcademyContinue renders only when {progress} exists. JourneyStrip renders only when {milestones.filter(m ⇒ m.value > 0).length > 0}.

Data contracts
WelcomeBand reads {member.firstName, member.tier, member.since, member.publicProfileUrl}. AttentionRow reads {member.computed.flags[]}. RecentWork reads {member.photos.slice(0,5)}.

Auth gate
All HubShell routes require role ≥ "member". SiteHeader Member Hub button navigates here. Unauthenticated redirect → /signin.
