V6 · STEP 7 · JULY 2026 V6 10 MEMBERS HUB PORTFOLIO INHERITS V6 00 · V6 91 · V6 92 · V6 09 NAVIGATION INHERITED FROM V6 12

Members Hub Portfolio Manager

The member's curation room. Inherits the Hub shell from V6 09 exactly — SiteHeader, 240px left rail, fluid main content, SiteFooter. Photography is the primary focus; selection state is secondary; editing tools stay visually quiet until needed. Migration reference: 04 BCC Hub Visual Master, Portfolio Manager section.

Design reference only — no implementation, no tokens, no CSS. The Hub shell is not redesigned here. Navigation (rail, tabs, mobile bar) is not owned by this document — it is inherited from V6 12 Members Hub Navigation via HubLayout / HubSidebar.

SHELL
Identical to V6 09 — 240px rail · fluid main

WALL
4-col desktop · 3-col tablet · 2-col mobile

INSPECTOR
Right-edge overlay — not a third column

GOLD CTA
One only — Upload Photograph (empty state)

01 Desktop — Portfolio Wall

Page Header carries the quiet metadata. Toolbar reuses the DirectoryToolbar vocabulary. Wall renders public MattedThumb cards at their original aspect ratio — no cropping, no object-fit. One mat shows the quiet hover state; two carry the Featured flag.

Portfolio Manager — wall, no selection POPULATED 1440 · shown at 50%

PUBLIC

Page Header: title + photo count + selected count + quiet "View public portfolio" link — no other metadata. Toolbar: search · genre chips (member's own genres only) · Status · Sort · Grid/List — 44px row, 14px gaps, reused from DirectoryToolbar. Wall: 4-col grid, 16px gap, each mat at its native aspect ratio. Featured flag rides the top-left corner in gold; status chip rides the label row. Hover reveals quiet ✎ edit / ☐ select controls — never visible at rest.

02 Desktop — Selection State

Selecting a mat activates the SelectionBar, sliding in above the wall. Selected mats carry a gold inset ring and a filled check. Delete is the only destructive action in the batch set.

SelectionBar: 56px, ink-900 surface, elevation e-2, sticky above the wall. Gold circular count badge. Batch ops in order Feature · Visibility · Move · Delete; Delete alone carries the rust destructive color. Selected mats: 2px gold inset ring + filled gold check, top-left.

03 Desktop — Inspector Panel

Opening a single photograph anchors the Inspector as a contextual overlay to the right edge of the Main Content Area. It does not widen the page or introduce a third column — the wall dims quietly beneath it.

FOCAL POINT
Set on preview →

Inspector: 440px overlay anchored to the right edge of the Main Content Area, e-2 elevation, scrim over the dimmed wall behind it. Contains Preview · Prev/Next · Caption · Description · Exhibition label · EXIF (mono chips) · Visibility · Focal point · Save. Never widens the page — the wall's 4-col grid is unaffected by its presence.

04 Desktop — Empty State

No photographs yet. Toolbar and SelectionBar do not render. The editorial empty-state frame carries the page's single gold CTA — Upload Photograph.

Portfolio Manager — empty EMPTY 1440 · shown at 50%

⬆ Upload Photograph

Your curation room is ready.

Upload photographs to begin curating your public portfolio — feature your best work, control what's visible, and tell each photograph's story.

Empty state: no hollow toolbar, no zero-count grid. Single dashed editorial frame with the page's one gold CTA. Matches the tone of V6 09's day-one empty state.

05 Tablet — 641–1199px

Rail folds into horizontal-scroll HubTabs. Wall runs 3-col. Toolbar wraps to two rows. Inspector becomes a bottom sheet rather than a side overlay.

641–1199px: HubTabs replace the rail. Toolbar wraps — search full-width, chips + view toggle on row two. Wall runs 3-up. Inspector becomes a bottom sheet, not a side overlay.

06 Mobile — ≤640px

HubMobileBar replaces the rail. Wall runs 2-up. Selection begins with a long-press. Inspector opens as a full-screen sheet.

≤640px: 2-col wall. Long-press a mat to enter selection (haptic + gold ring); tapping thereafter toggles selection. SelectionBar docks above the wall, below the header. Inspector opens full-screen on tap of a single mat.

07 Specification

SECTION ANNOTATIONS

① **Page Header** — title, photo count, selected count, quiet public-portfolio link. No gold CTA here — the CTA lives only in the empty state.

② **Toolbar** — DirectoryToolbar vocabulary: search, member's-own-genres chips, Status, Sort, Grid/List toggle.

③ **Portfolio Wall** — MattedThumb cards at native aspect ratio. Featured flag top-left, status chip on the label row, quiet hover controls, selection ring.

④ **SelectionBar** — slides in above the wall on first selection. Batch ops: Feature, Visibility, Move, Delete. Delete is the only destructive action.

⑤ **Inspector Panel** — right-edge contextual overlay on desktop, full-screen sheet on mobile. Never a permanent third column.

INFORMATION HIERARCHY

1. Photography (the wall)
2. Selection state (gold ring + check)
3. Toolbar (quiet, always available)
4. Page Header metadata
5. SelectionBar (appears only when needed)
6. Inspector fields (opened intentionally)
7. Left rail (wayfinding)
8. Site header (public exit)

Editing tools stay visually quiet until a mat is hovered or selected — this is the curation room, not an admin dashboard.

SELECTION BEHAVIOUR

Desktop/tablet — click a mat to toggle selection; SelectionBar appears on first selection, disappears at zero.

Mobile — long-press enters selection mode (haptic feedback + gold ring); subsequent taps toggle. Tapping empty space exits selection mode.

Delete — always requires a confirmation step; the only destructive batch action.

RESPONSIVE + CONDITIONAL

`≥1200 4-col wall · inspector overlay`
`641–1199 3-col wall · inspector sheet`
`≤640 2-col wall · long-press · full-screen inspector`

Conditional rendering
SelectionBar: hidden when selection count = 0
Toolbar/SelectionBar: hidden entirely on the empty state
Featured flag: renders only when photo.featured = true

Empty state
Single gold CTA — Upload Photograph — replaces the whole wall + toolbar.

COMPONENT TREE

```
HubLayout (role ≥ member)
├ SiteHeader {session, member}
├ HubSidebar {hubNav[], activeRoute:"portfolio"}
  ├ HubRail [≥1200px]
  ├ HubTabs [641–1199px]
  └ HubMobileBar [≤640px]
└ HubShell
  └ HubMain
    ├ PageHeader {photoCount, selectedCount}
    ├ DirectoryToolbar {search, genres[], status, sort, view}
    ├ SelectionBar? {selection[]}
    ├ PortfolioWall {photos[], view}
    │  └ MattedThumb ×n {photo, selected, featured}
    ├ InspectorPanel? {photo, prev/next}
    └ EmptyState? {ctaOnly:true}
SiteFooter
```

? = conditional
SelectionBar renders only when {selection.length > 0}. InspectorPanel renders only when a single photo is opened. EmptyState renders only when {photos.length === 0}, replacing Toolbar + Wall entirely.

Data contracts
PageHeader reads {member.photos.length, selection.length, member.publicProfileUrl}. PortfolioWall reads {member.photos[]} filtered by toolbar state. InspectorPanel reads {photo.caption, description, exhibitionLabel, exif, visibility, focalPoint}.

Auth gate
Inherits HubLayout per HUB-ARCH-001 — role ≥ "member" required. Unauthenticated redirect → /auth/signin.

BCC UNIFIED PLATFORM V6 · STEP 7 · JULY 2026

V6 10 Members Hub Portfolio

Migrates 04 BCC Hub Visual Master's Portfolio Manager onto the frozen V6 09 Hub shell. Design reference only.
