SiteHeader

Complete reusable design reference for the SiteHeader Astro component. Six authenticated states. Two scroll surfaces. Desktop 1280px and Mobile 390px. Every remaining V6 wireframe places this component at top — no further header design required.

Inherits V6 00 BCC Design Principles. Design reference only — no implementation, no tokens, no footer, no pages.

01 Component Architecture

Three fixed zones. Zone boundaries are preserved across all six role states. Only Zone 3 content and two conditional nav items change between roles.

ZONE 1 — Logo | ZONE 2 — Navigation | ZONE 3 — Right Rail

ZONE 1 — LOGO

```
BCC New Logo Full Black Text.png
height: 56px rest → 44px condensed
filter: none → brightness(0) invert(1)
transition: 0.35s cubic-bezier(0.4,0,0.2,1)
min click target: 44×44px · links to /
```

ZONE 2 — NAVIGATION

```
Inter 13px / weight 500 / gap 24px
Active: 2px #A8843C underline
Hover: transition to navActiveColor
Dropdown: ▾ caret + position:relative
Coming Soon: opacity 0.45, cursor:default
Collapses to hamburger at ≤900px
```

ZONE 3 — RIGHT RAIL

```
Flex row / gap 16px / align-items center
Avatar: 34px circle / r-full / 2px white ring
▾ caret: 10px, opacity 0.6
CTA max: one primary + avatar
Admin Console: always dark bg + gold text
Mobile: CTAs collapse into drawer
```

POSITION & CONTAINER

```
position: fixed
top: 0; left: 0; right: 0
z-index: 100
width: 100%
inner: max-width 1280px

CURRENT STATE
Guest — Unauthenticated

RIGHT RAIL
"Sign In" text · "Become a Member" gold gradient CTA

NAVIGATION
All public nav incl. Membership. Learn greyed at 0.55 opacity.

DESIGN NOTE
Single gold CTA rule: one gradient-gold element only.

DEMO — fixed positioning simulated within document context.

03 All States — Static Reference

Each role at rest (transparent surface). Written out literally for direct reference. "Home" shown as active nav item across all states.

01 · GUEST Unauthenticated

BHOPAL CAMERA CLUB | Home | About | Showcase | Activities ▾ | Learn ▾ | Membership | Journal | Sign In | Become a Member

Single gold CTA rule enforced. Sign In is quiet text. Membership in nav drives discovery. Learn greyed at 0.45 opacity — Coming Soon.

02 · USER Authenticated · No Membership · MEM-006 P1

BHOPAL CAMERA CLUB | Home | About | Showcase | Activities ▾ | Learn ▾ | Membership | Journal | Apply for Membership | RU ▾

Gold CTA replaced with outline "Apply". Grey avatar. Membership nav retained. Registration ≠ Membership (constitutional).

03 · MEMBER Authenticated · Membership ACTIVE

BHOPAL CAMERA CLUB | Home | About | Showcase | Activities ▾ | Learn ▾ | Journal | Member Hub | AB ▾

Membership nav removed. All acquisition CTAs gone. Member Hub outline-gold + forest-green avatar.

04 · EDITOR Authenticated · Content Editor RBAC Role

BHOPAL CAMERA CLUB | Home | About | Showcase | Activities ▾ | Learn ▾ | Journal ✎ | Member Hub | CE ▾

Journal ✎ is the only top-nav Editor signal. Teal avatar. Hub sidebar reveals Journal CMS section on entry.

05 · MODERATOR Authenticated · Moderator RBAC Role

BHOPAL CAMERA CLUB | Home | About | Showcase | Activities ▾ | Learn ▾ | Journal | Member Hub | MO ▾

No top-nav Mod indicator. Mod queue accessible only via Hub sidebar. Amber avatar distinguishes from Member/Editor.

06 · ADMIN Authenticated · Admin Role · Highest Trust

BHOPAL CAMERA CLUB | Home | About | Showcase | Activities ▾ | Learn ▾ | Journal | • Admin | Admin Console | AD ▾

Admin Console replaces Member Hub. Gold dot in nav. Dark button + gold-on-dark avatar. Visually unambiguous highest-trust state.

04 Scroll Behaviour — Two Surfaces

Transparent at rest. Dark glass after 60px scroll. All six states apply to both surfaces. Transition is 0.35s — the same easing governs logo scale, surface, and text colour simultaneously.

08 Behaviour & Animation

BEHAVIOUR	DETAIL	TIMING / EASING	GSAP HOOK
Scroll condense	After 60px scroll: height shrinks, surface darkens, logo inverts. All properties transition simultaneously.	0.35s · power3.out	header-condense
Dropdown open	Fade + 8px vertical slide from trigger point. Closes on outside click, Escape, or nav-away.	0.18s · power2.out	—
Avatar menu open	Same as dropdown. Right-aligned. Closes on outside click or Escape.	0.18s · power2.out	—
Drawer open	Full-screen overlay slides in from right. Backdrop dims to 40% black. Body scroll locked while open.	0.28s open · 0.22s close	—
Nav hover	Item transitions to navActiveColor. Underline does not extend on hover — it is reserved for the current route only.	0.15s · ease	—
prefers-reduced-motion	All GSAP transforms disabled. Colour and opacity changes remain — they are not vestibular triggers.	immediate · no easing	—

09 Accessibility & Responsive

ACCESSIBILITY REQUIREMENTS

- **Role:** `role="banner"` on <header>
- **Nav:** `role="navigation" aria-label="Main"`
- **Hamburger:** `aria-label="Open menu" aria-expanded`
- **Dropdowns:** `aria-haspopup aria-expanded`
- **Avatar menu:** `aria-label="Account menu"`
- **Touch targets:** minimum 44×44px on all interactive elements
- **Focus trap:** keyboard focus trapped inside open drawer
- **Skip link:** `"Skip to main content"` first focusable element
- **Current page:** `aria-current="page"` on active nav link
- **Coming Soon:** `aria-disabled="true"` + visually hidden label

RESPONSIVE BREAKPOINTS

Breakpoint	Behaviour
>900px	Full desktop nav. All items visible. Dropdowns on hover.
600–900px	Hamburger drawer. Logo 28px. CTA chips only in header.
<600px	Same as 600–900px. Safe area insets via env(safe-area-inset-*).
Tablet	Follows 600–900px rules. Landscape may show partial desktop nav.

Sticky behaviour: Header is always sticky. No hide-on-scroll — the nav is always accessible. The condensed surface is the "scrolled" affordance.

Safe areas: Padding respects `env(safe-area-inset-top)` on iPhone notch/Dynamic Island. Drawer uses `env(safe-area-inset-bottom)` for bottom padding.
